Module 5

Final Analysis:

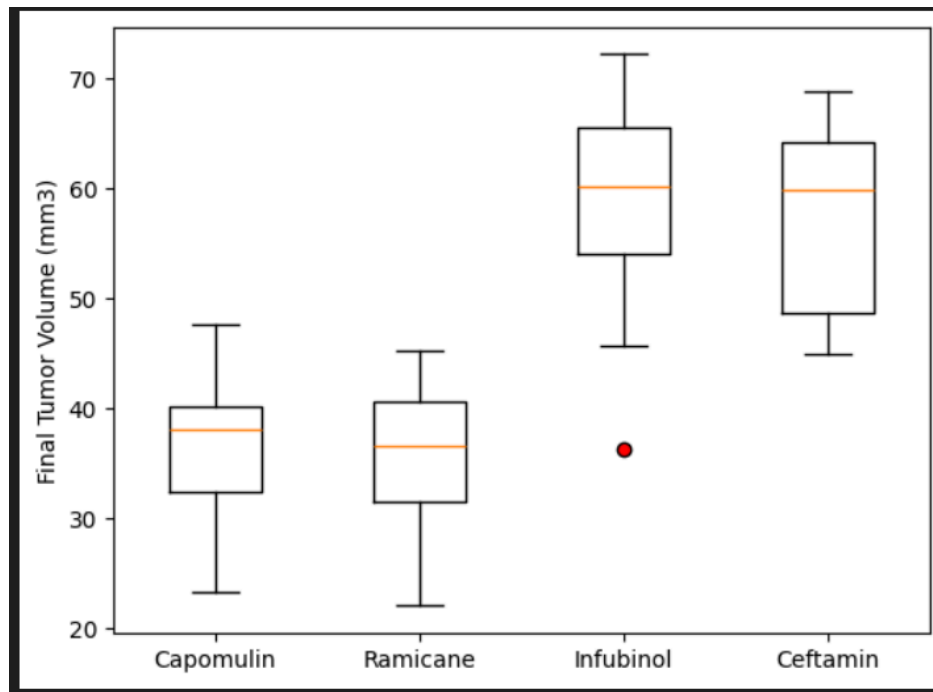

- One mouse ID has duplicate values.
- Capomulin and Ramicane has almost same number of rows. Propriva has least number of rows.

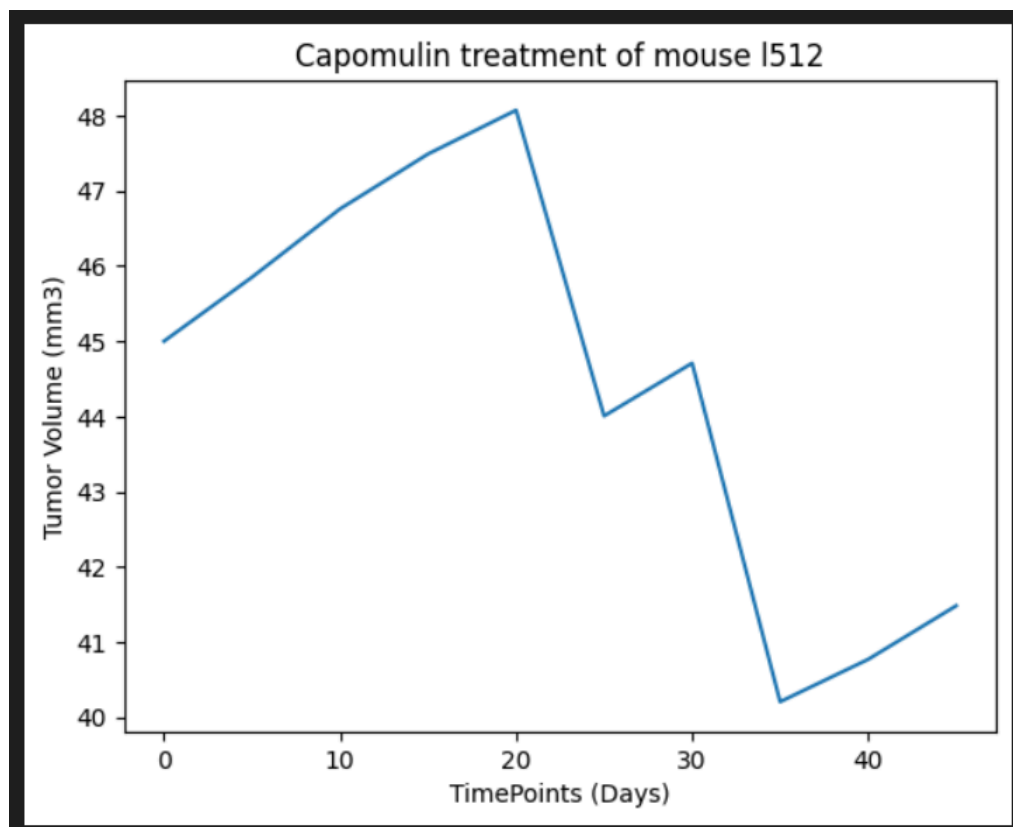

- The distribution of male and female has minor difference.

- Only Infubinol among all has one outliers.

- Capomulin treatment of mouse I512: there is a drop in Tumor volume as days increase.

- The relationship between Average Tumor volume and weight shows rising growth.
